To: GFP Wild Info
Subject: West River Deer Season Dates for Corson County

Hello,

I would like to comment on the proposed change of 2015 deer season dates for Corson county. For the past many years, Corson county has always opened two weeks before the regular west river deer season. As you may know, there isn't much in Corson county for lodging, and as such, we have to get our lodging booked many months in advance. We have been accustomed to booking our lodging as soon as the GF&P posts the tentative west river deer season dates on their website, assuming that the Corson dates will remain the same as they have in the past. I would understand and be okay with changing the dates for Corson if we were given more advance notice, but announcing that change this late in the year will be very difficult for us to deal with, and I would imagine there are multiple others in our same situation.

I would also ask to help understand the reason for the season to be changed for Corson county. I always understood that the reason the season opened a few weeks earlier, was to give the state hunters an opportunity to hunt before the tribal hunters harvested all of the deer. As I'm sure you are aware, the tribal season typically opens early October for tribal hunters and mid-October for non-member tribal hunters. Moving the Corson dates back by two weeks will put us state hunters at a disadvantage as the deer will have already been hunted for over a month by the time we are allowed to start hunting.

Please take these comments into consideration when setting the West River Deer season dates at your June meeting.

Regards,

Austin Falkingham

Subject: 2015 Black Hills deer seasons.

The deer population has exploded!!

I've spent a lot of time Turkey hunting from Deadwood to South of Custer. From I90 to the Wyoming border.

We saw multiple herds of Deer every mile, even during the day. both Mule and whitetail.

And the fawns haven't even dropped, yet!! With an early spring and an abundance of green grass, there will be a huge population of fawns.

The herd could almost double, which will be a problem next winter.

I urge you to increase the number of firearm Licenses for residents even more that you already have., especially for antlerless deer both Whitetail and Mule. We need to reduce the antlerless deer population.

I was unable to determine what you have done with Black Hills Muzzle loader, but again, you should issue many, many more resident, any deer license tags and increase the length of the season.

Again....please issue many more any deer resident licenses and antlerless resident licenses for firearms and Muzzle loaders.

And for Pete's sake, reduce the cost of non-resident deer bow license!!!

It should be reduced to be only about double that of a resident archery license. We are losing hunters and revenue to other states.

I guarantee that will get more archery revenue than we're getting now, and we won't be tagging that many more deer. Plus all of the incidental revenue that we'll get with having more hunters.

Having our non resident archery tag being the same cost as a non resident firearm tag is an embarrassment!

The Turkey Population? Bleak. And we have lost most of the first hatch eggs due to the cold and snow.

We're hoping for a decent second hatch. There are some jakes around, but there is are very few mature toms.

Thanks, Grant Jones

Subject: Against change

Hello,

I am a concerned hunter for Ziebach county. This is because if you change this date, the tribe will still stay the same and the deer may be scattered by the time state licenses are valid. This would cause me not to be a participant of west river deer season. Thanks for hearing me out.

I don't agree that reducing tags in all of west river is a good idea. We need to manage the does in 2A. Lots of young deer and no shortage of bucks. Wet springs that last 2 years and mild winters kept a lot of deer alive. My suggestion is maintain or increase the number slightly.

Thank you.

I am sorry to hear that you are considering removing the nine day antlerless season. I have 3 to 4 friends that do a New Year Day hunt with me for several years. I know of several others hunters that use this time to gain access to hunting areas that are paid buck hunting. Since the buck season is over landowners open these areas to antlerless hunters to reduce the doe numbers on their property. The property that we hunt has around a hundred antlerless deer on it after the any deer season. I feel that you would be doing a real disservice to your resident hunters by removing this season. You have already removed the conversion of the any deer tag and the double antlerless tags from this season. This is a season that we enjoy to hunt for meat and do not have to be in compete with out of state buck hunters.

I believe that you should not get rid of the nine day antlerless season because that gives us hunters extra time to hunt if we didn't fill our tags during the first three weeks. As I used to live out of town from where I go hunting at I was only able to hunt one weekend out of the three and then I would come home again for this second season. Please consider in keeping this nine day season!

Dear SDGFP,

I hope you will not remove the 9 day deer extension season. I live in Minnesota (I grew up in the Wessington Springs area), and it's just simply nice to have that second season available to help in case one doesn't get a deer during the first half of the season and also if one has scheduling conflicts. To take away the nine day extension would be unfortunate for all those who hunt deer in South Dakota. Thank you for your consideration.

John Morris
Pierre, SD

I would like to comment on the removal of the 9 day antlerless season. I realize that there may be a reason for doing this that is related to such things as deer management or other reasons that I am not aware of or that are outside of my area of expertise. However, I would like to make a few comments why I see this has a great reason to keep in place. First, this additional season has allowed me time to take a first time adult deer hunter out to fill an antlerless tag the past 2 years because there is more access to private land that isn't accessible during the normal season. Second, during this additional season I have allowed hunters to hunt our private land that normally wouldn't have access to land during the normal season. I don't own a lot of land but the additional season allows hunters who are looking to only fill an antlerless tag to have access to land that was being hunted by others trying to fill buck tags. The additional antlerless season allows so many people who are just trying to put meat in their freezer an opportunity to do so that they normally can't do due to access of private land.

Thank you for the opportunity to provide my comments. Once again, I don't know all of the details for eliminating the season and I will support a decision made either way but I feel it essential for the Department to also know the benefits of the additional season from a hunters point of view.

Thanks, John

In regard to the Commission's proposal to remove the nine day antlerless season for both East and West River deer hunting seasons.

I oppose this change. I generally hunt East and/or West River deer about 2 days/year during the post-Christmas antlerless season. In ~ 10 years of hunting the late antlerless season, I don't think I've ever harvested a deer during this time, largely because the deer don't move around nearly as much that late in the year; but I've thoroughly enjoyed getting out and hunting after the busyness of the pre-holiday season. If too many antlerless deer are being harvested, I'd prefer to have fewer antlerless tags available than to remove the 9-day antlerless extension season.

Sincerely,

Mike Lees

I am writing to oppose the elimination of the 9-day antlerless deer seasons for east and west river. This season has given myself and my two sons the opportunity to hunt private ground that we do not have access to during the regular season. The timing of this season fits well for college and high school students to hunt over their semester break with family. The landowners have always been glad to have us come out and harvest whitetail does off their property during this hunt, and I believe that it is a good tool to help control the deer population. Personally, hunting during this extended season is always more enjoyable as the hunting pressure is far less, and it gives me the opportunity to collect some venison that I can enjoy until the next season.

I would urge the commission to keep this extended season in place.

I would ask the commission to please consider continuing the after Christmas antlerless season. Having hunted in the Mobridge area since 1971 the quality of the hunting experience during the regular east and west river seasons has declined significantly because of the number of hunters in the field. I like to "spot & stalk" then plan my hunt based on the patterns that the deer establish. The increased number of hunters traveling in the area that I get permission to hunt on totally destroys any patterns that the deer may develop. Prior to the antlerless season I typically go out ahead of this season and am able to determine those patterns because of the lack of hunters. Additionally, the antlerless season also provide me with the addition recreational/hunting opportunity that I enjoy.

Dear Sirs,

I would like to comment on the additional 9 days doe hunting;

I would be in favor of continuing this excellent/beneficial additional hunting season for at least two reasons. Busy schedules/everyday living is very sporadic and hectic and the additional time helps to get deer tags filled. The other reason is the weather doesn't always cooperate with the first season, recently we had a 90 mile an hour wind that blew snow into all the tree belts and virtually shut down the deer moving, it was a very hard time to hunt, and without the additional time frame, the freezer would have been empty. I have younger hunters as well and it gives more opportunities to get out there with them as well.

I would be in favor of keeping this additional deer hunting time, and appreciate all you guys do to keep our hunting privileges alive and well. Thank You!

Dear Commission members,

I am opposed to eliminating the nine day antlerless season west river. I have found this to be a very good tool for deer herd management. I allow many friends, neighbors and youth hunters to harvest deer during this time frame. If this season were eliminated, these hunters would not be given an opportunity to put meat in their freezer as I cannot accommodate them during the regular(buck) season.

I urge you to continue this important deer management season.

Thank you,

I agree with the decision to restrict antlerless harvest. Having hunted VA, FL & AL more extensively than SD, my feeling has always been that game officials tell hunters to shoot does but they HARDLY EVER tell us to stop. As land owners, we have self regulated in VA (Franklin Co.), where I have hunting land, we lost probably 80% of our herd 3 years ago to blue tongue. We have restricted our harvest accordingly and have only taken 2 bucks and NO does since that time. The population has been rebounding and I expect may be back to previous densities in another 2 seasons. It will take several seasons for your restrictions to work.

When hunting my wife's family farm in Gregory Co., SD, I see as many bucks as does however it has been 3 years since I have seen a mule deer antlered or antlerless.

Hello my fellow gfp officers,

I am writing about the proposal of cutting the nine days off after Christmas. I know you are trying to save man hours and decrease money spent on those days but as a concerned hunter those days are the only days I am able to go deer hunting. The reason I cannot go during the regular season is because I work at the post office here in Sioux Falls. During the busy season of course, when there are a lot of people having the day off I have to sacrifice giving up the things I like to do in order to get the mail to our customers. I would appreciate it if you would not get rid of those days so I can enjoy time with my wife and kids doing what we enjoy most. Thank you for considering not cutting the days.

Sincerely,
Troy Gilman

I do not understand why you would remove the antlerless season?
I travel throughout the state and see many deer in a daze time and many car deer kills.
I would agree only if the state made it that all residents are guaranteed a deer tags for east and west river seasons.
I came from Mn and WI and all residents get a buck tag and non residents apply! or they
get a tag at an up charge cost.

Subject: Deer proposal comments

Thank you for the opportunity to respond to the GFP's proposed changes to the West River Deer Hunting Seasons. For several years now, I have been successful in drawing and filling a two-tag license for Unit 15A. There has been a few years where I took advantage of the extended antlerless deer hunting season after Christmas, primarily because I had to cut my hunt short and was not able to fill both tags during the general hunt. I love hunting white-tails and have long ago decided that they are by far the best red meat available. Hence, I strive to fill both tags.

If the antlerless season after Christmas was eliminated, I doubt that it would reduce the harvest, since many hunters like myself would make every effort to fill his/her two-deer tag during the general season. The number of hunter-days might not change. There could be more effort during the general season to get that extra tag filled. Eliminating the antlerless season might save some early-shed bucks, which I have harvested during this season.

Question: Why did this issue surface in the first place? I try to follow the GFP efforts in managing our deer herds, and I was under the impression that the West River population was starting an upward swing. What data has been presented to the Commission for them to even consider this?? If it is an issue of saving mature bucks, I would like to see the data that shows that early-shed bucks are being taken in excess.

I regret that the press release did not share more information and that the GFP does not share more biological information with the public. I have found that they are not very transparent in this areas. However, I do want to express my opinion that the GFP is doing a fine job in managing our deer populations.

I can not support this proposal without seeing more data.

Again, thank you for allowing me to comment.

Sincerely,

Thomas Hoffman

Hi, my name is Richard Coykendall, I have been hunting West River for several years. I think changing dates and shortening the season is not a good idea, my son and I hunt Corson County and also hunt the Standing Rock for about 12yrs. I think it could be devastating to the economy, it is already hard enough finding a place to stay and now it would take a whole week away from your small motels and restaurants. As a small business owner of sporting good store, I know how bad that could be. For us, we would have to cancel our reservations because we might not be able to hunt Corson County this year with the change proposal. Thanks for letting us have some input, Rich

To whom it may concern,

I do not see any benefit in eliminating the 9 day antlerless portion of the East River Deer Season. I also feel that with the slight increase in tags given that also it should go back to any unfilled "any deer" tags being converted into "any antlerless" tags for the 9 day antlerless deer season. The reason for this is an overpopulation of deer that are constantly being hit by cars. I know many hunters who receive an "any deer" tag that try the entire regular season to fill with a buck, and would still use their tag on a doe if it would convert to an "any antlerless" tag for the 9 day antlerless season. Thank you for hearing my commits.

If the dates are change to November 14th rather than it being the same as it always has been November 1st. We who own deeded land in those counties would have to hunt 13 days after tribal season starts. The people who hunt in those counties should have the same opportunity to harvest a great deer as the tribal member. A game warden can not be in every spot at once to stop tribal members from hunting deeded land but The people that hunt the land can make sure that no tribal member is on their land. That is why it was great to have the tribal season and the state season at the same time is because we were all equal and we can make sure that tribal members stay on tribal land. If the dates where change you would see a decrease in tags being sold in those counties because we would know that the tribal members had the first opportunity at great bucks. Please give us the same opportunity as the tribal members to harvest a great deer this season and many season after

First I want to say thank you about thinking about get rid of the late deer season for does it is not smart to shoot does that late when they possibly could be pregnant. Changing the dates for ziebach corson and Dewey county is not a smart decision. If these dates were changed then we would have to hunt 14 days after the tribal season. That is not fair for the people that have to hunt deeded land. We should have the same chance to harvest a good buck as the tribal members.

Commissioners,

My name is Gary G. Colbath, I live in Rapid City, SD. I am an avid outdoorsman and have hunted our great state for the last 30+ years. I spend dozens of days a year in the field across the state bow and gun hunting big game. I am on the Board of Directors for several sportsman and conservation groups including SD Bowhunters Inc. Please follow through with recommendation to eliminate the 9 day antlerless season statewide. Our herd is way down as you know and the deer need time to recover. There will be little to no impact on those who need to harvest a deer by eliminating this portion of the season but it may keep many adult does alive for another year to help rebuild our herd.

Thank You for your efforts and service.

Gary

To whom it may concern:

I do not think the season should be changed. If it is, public lands should not be affected (At least not the Mirror Lake unit.). I live in Spearfish. I hunt the unit Mirror Lake is located in. Unfortunately, when I log on the GFAP website I cant view the unit because deer tags are unavailable. I hunt the Mirror Lake unit because it is close to me. I have asked many ranchers in this unit if I can hunt on their land, but I have always been told no. There are ranchers I haven't asked but I am discouraged. Ask enough times and get told no, you become discouraged and stop asking. (Probably so that the rancher can get his check from the government for crop damage caused by deer). Mirror Lake is a very small area and it is the only public land in this unit. So I am competing with a number of hunters to hunt this area. Numerous times I go out there to hunt and it is over crowded so I leave. Sometimes I go out there to hunt, I get there before sun up, just to have someone walk in front of me after the sun comes up. No point sitting there now because all of the deer have been scared of because someone is out there walking around about the time the deer start moving. When January comes around and it is cold, there are not many hunters out there. That is when I get my deer. I put in for an any deer tag for this unit. It becomes a Doe tag in January. I do not hunt horns. I will shoot the first thing that comes along because I hunt meat. If you take away the nine days in January, I will not get my deer. I understand why you are trying to keep the deer at an optimal level. However, from my experience, there not many hunters in this unit in January because it is cold. The ones that are, want and hunt meat. Please don't take away these days in January. If you do take away the nine days after Christmas, do not apply it to all areas. However, I also wonder, If the unit Mirror Lake is located in does allow the nine day season and other units do not, will the number of hunters increase in Mirror Lake

Thank you,

Fred Eland Septka III

Subject: Deer proposal comments

Ladies and Gentlemen:

I would like to offer my comments concerning your proposal to discontinue the nine day antlerless season for East and West river deer hunting seasons.

My oldest of five children participated in her first mentored deer hunt last fall. The weather was unseasonable warm well into November so we avoided the early youth season and never hit the field until the opening weekend of 'regular' East River deer season. I spent the first two weekends mentoring her in harvesting her first deer. I was then left with only the last weekend of regular season to try to fill my 5 tags consisting of one any deer and four antlerless only tags. While I was successful in filling two of those tags, had it not been for the 'doe only' season, I would not have been able to fill my remaining three doe tags.

My family has always relied on deer meat as a staple in our diet. Without the opportunity to fill those last three tags, my family would already be running low on meat for the year. From an economic standpoint, those extra 'doe only' hunting days have been instrumental in helping me to put meat on my family's dinner table.

From a sporting viewpoint, I would like to continue to mentor my children as they come of hunting age and help them to love and grow in the sport of hunting. Doing this takes a considerable time commitment from a father (or other guardian). I find that I have little time for my own hunting until late in the year when my children have had the opportunity to get out in the field. While the early youth and mentor seasons are intended to solve this predicament, it does not always pan out that way. If temperatures are too warm during those pre-season periods, I elect to wait for cooler temperatures when I know my game can be preserved without the need for immediate cooling or refrigeration measures.

Lastly, I get great pleasure in hunting during the last few days of the extended 'doe only' season when few other hunters are around. I greatly enjoy stalking deer when every section line doesn't have a rattling pickup truck driving down it in the pursuit of a monster buck. Late season hunting, whether for pheasant, duck, goose or deer, is a relaxing, beautiful experience that is unlike that of any early season or regular season hunting experience. If I had my choice between hunting in November or December, I would certainly choose the later.

While I understand that there may be legitimate reason(s) for eliminating the late doe season, I would ask you to consider the aforementioned reasons for keeping it. I've been hunting for 33 years. I'm a father who is passionate about involving my children in that experience. Hunting puts food on my table and provides an outdoor recreation experience for families like no other I know. For a variety of evolving reasons, 3 weekends in and around Thanksgiving does not always work for every person nor family. Those extended days later in

the season matter. To the guy who drives aimlessly around in his new pickup truck looking for the biggest buck so he can mount the horns and give the meat away to some stranger, those days don't matter at all. To the guy who lays out in fence line or stubble field for hours on end during a late December blizzard with a smile on his face and the hope of dragging a fat doe a half mile back to the road, those late season days matter more than you could imagine.

Thank you so much for your time. Sincerely,

Scott Madsen

Subject: FW: West River Deer Season Dates for Corson County

From: Austin F [<mailto:afalkingham@adamsthermal.com>]
Sent: Thursday, May 14, 2015 8:56 AM
To: GFP Wild Info
Subject: West River Deer Season Dates for Corson County

Hello,

I would like to comment on the proposed change of 2015 deer season dates for Corson county. For the past many years, Corson county has always opened two weeks before the regular west river deer season. As you may know, there isn't much in Corson county for lodging, and as such, we have to get our lodging booked many months in advance. We have been accustomed to booking our lodging as soon as the GF&P posts the tentative west river deer season dates on their website, assuming that the Corson dates will remain the same as they have in the past. I would understand and be okay with changing the dates for Corson if we were given more advance notice, but announcing that change this late in the year will be very difficult for us to deal with, and I would imagine there are multiple others in our same situation.

I would also ask to help understand the reason for the season to be changed for Corson county. I always understood that the reason the season opened a few weeks earlier, was to give the state hunters an opportunity to hunt before the tribal hunters harvested all of the deer. As I'm sure you are aware, the tribal season typically opens early October for tribal hunters and mid-October for non-member tribal hunters. Moving the Corson dates back by two weeks will put us state hunters at a disadvantage as the deer will have already been hunted for over a month by the time we are allowed to start hunting.

Please take these comments into consideration when setting the West River Deer season dates at your June meeting.

Regards,

Austin Falkingham

Subject: GFP Commission Proposals Objections

GFP Commission,

I wish to object to the removal of the 9 day antlerless hunting the Saturday following Christmas, I am not sure why you are considering this? I would like it to remain as it has! Not all people are able to hunt and or bag their deer during the normal season dates and this extra season helps those people! Also it is unfair to people living in the shaded areas for the muzzleloader antlerless season. People living in the SE and SW portions of the state are put at a big disadvantage and expense in having to drive so far in order to hunt for the muzzleloader antlerless season! Why are you penalizing us??

Thanks,

Rick Bohn

Subject: Oppose season closure

My name is Shane Simon and I live in Lawrence county near Nemo, SD. I am writing to express that I DO NOT want to see the 9 days of antlerless hunting for deer after christmas to be closed. Getting permission without having to pay during the "horn hunting" season is getting to be near impossible! My only option for hunting is to hunt for antlerless deer when land owners are assured that I will not harvest a deer with horns. I have relied for many years now on being able to hunt later in the year during this season when the hunting pressure is reduced. In short, please do not close the season for antlerless deer!

Subject: Please don't change the season dates

Changing the season dates to the same as all the other counties in the state is unfair for the people that hunt in ziebach, Dewey, and corson. All of the other counties don't have a tribal season in there counties. We should have the same opportunity as the tribal season to harvest a good buck.

> To whom it may concern: I object to this proposal to remove the antlerless season. Last year traveling thru the state to Potter County for my hunt, I saw many deer, both alive and dead. With all the deer I saw I wondered why I (and others I would imagine) could only hunt one, as well as why prices doubled for that one deer. Word during conversations with land owners was deer population decline and revenue, however they sure were not seeing any decline. A couple of weeks ago I was looking at the upcoming season and noticed I could apply for a 2-tag any antlerless for \$120.00 and was happy to see this. I called to say thanks and get other information. Today I could not find that info online again. This year I was planning on my son also hunting with me. I feed my family on this meat and rely on this hunt. A number of years ago I had to move out of SD for work, but as a (now) non-resident this hunt remains important to me. I was surprised to see this latest proposal.

What are the main reasons for closing the 9 day late season antlerless season is it simply a down population issue or land owners tired of the long hunting season in general????? Reason I ask is I live out of state and have participated in the late season hunt many times as much easier to get on land as the residents have filled their doe tags by that time so nice when we drive that far and get on quality land....

Have a Great Day!!!

Subject: east river deer proposals

east river deer: Dear commission:

as a land owner in brookings county, I continue to see very little change to the ever shrinking in area of whitetail deer and season .. the lack of hunting opps. is on the decline with more and more crp disappearing every season. and with the advancing farming practices little remain for wildlife to survive in or on. u yet we continue to offer landowner tags at a n alarming rate/ and the only criteria to obtain a lic annually is by being a member of a farming family.. who maybe farms or does nothing and still qualifies.. for a lic.. as does all the members of the family.// and why? just because they own farm ground. and by the end of dec. the only t hing left is back dirt and stocks

as now take a family of four. they auto get 4 any deer cry baby tags... they then apply for 4 muzzle tags, then 4 bow tags,
do the math,,, 4 bucks rifle
4 bucks bow

4 bucks muzzle that's twelve bucks alone supposedly shot on their own land, which seldom happens and we all know that... I just feel it is time to treat all the same.. give each applied landowner one any tag free for the year... you can use
it for rifle , muzzle , bow.. but you only get one.. the rest of the family will have to go into the common draw like all else.

and for the rest of us,, you too can apply, but you will only get one buck license per yr.. shoot it with a rifle, muzz, or bow, but only one buck in a year. does are your remaining choices with the other seasons.

and it is finally time for someone in the legislature or gfp to really start enforcing the drive around bunch.. it has only gotten worse partly do to the concentration of deer in certain areas due to the farming practices.. so drive, harrasss, shoot from the truck window , truck bed, off the 4 wheeler.. its all out there and only getting worse.. fines alone wont stop it.. but immediate loss of license for rest of the season and two more would... many a day bow hunting I wil see the same vehicles sometimes once an hr. all day long. and if one is spotted it quickly, due to soc. media. becomes a full blown circus of trucks and the chase begins
end all the seasons on dec. 31st.. no need for a longer season... the muzzle is basically a single high power and the colder that it gets the more of truck driving happens.. a month is long enough.

Subject: 500 extra licenses

To whom it may concern. With deer numbers as low as they are across the state, with the decrease in the number of West River deer tags the last two years due to EHD, and low success rates across the state, why is it that the Commission thinks that they should increase the number of Black Hills Deer tags this year? The population is still trying to rebound from everything that has been going on the last four years. We shouldn't increase the number of tags yet! The population has been devastated by EHD, Cats, car collisions, etc. Let's not get too hasty about increasing the number of tags in the Black Hills just yet. The money will just have to come from somewhere else! I realize that the budgets have gone down lately, but our deer population hasn't recovered enough yet for an increase in tags. Use good judgement on maintaining consistent and responsible deer numbers not just in the Black Hills, but all across the state. If it means less tags for a few years, then so be it.

On another note; if you do increase those licenses, then South Dakotans deserve to have a reduction in the costs of our deer tags. We used to get W. River double tags for \$35, then it went to \$45 for two, now it's \$45 for one! We are constantly getting charged more and more for our tags, and frankly, I'm sick and tired of paying more every year for our heritage and pastime! I can't afford to go other places to hunt. Please use better judgement on these items. I've been commenting almost every year about some of the proposals, and this one burns me up. Try and realize what you're telling the people of this state. Every time you increase costs, you are limiting the number of South Dakotans hunting here. Please, look at the costs of such items. South Dakota elk=\$175 +\$10 application fee, ridiculous. Compare with the costs Wyoming residents spend on their elk and deer. Elk=\$52 Deer=\$38

Hello

These comments are for the consideration of the commission for their June 4-5 meeting.

Removal of the 9 Day Antlerless season:

I do not support this move. Having this additional window allows me a "second chance" or "last chance" to fill a tag. The last few seasons I have had to either miss the standard season entirely or only spend 2 days hunting due to professional commitments. Having this opportunity is nice because it allows me to more time in this field if I am not successful in the short window earlier in the season. I have filled tags during this extended time before. I have also filed miserably, but having the opportunity to even get out and do so was more important and rewarding than just filling a tag.

Please consider not removing these dates. They are enjoyed by those of us who put them to use.

I think these are good changes. I do hunt Corson county. It has been ridiculous the amount of pressure placed on these deer because of the earlier season and the extended tribal season. It will also likely result in easier enforcement. At some point there needs to be a complete crackdown, a sting of sorts, in these counties with dual tags (tribal and state). A message needs to be sent that trespassing will not be tolerated. I witness multiple events each year and it is just too much for one and sometimes two CO's to try and cover.

I have been hunting in Corson county for around seven years and really like the earlier season, it gives me and my brother-in-laws that go some flexibility as to when we can all get together for a weekend and go. The proposed start put it only 1 weekend before East River season, which does not allow much flexibility. I would really like to see the season dates for Corson, Dewey and Ziebach Counties to stay the same.

To whom it concerns,

I find this date change very irrational. State hunters having both east and west river deer season at the same time is going to cut down on our harvests. I live east river, and hunt both east and west. At least with different season dates South Dakotan's can effectively hunt both sides of the State successfully with a couple weeks to hunt both sides of the State. Thus making more money for the State, by State residents and not out of State residents. Many of them don't even know our States laws and are and can be very reckless and endangering. I guess someone there is looking at the aspect of out of State people paying more than State residents??? Try looking out for the residents that live and hunt here. I am a career Veteran and I find this absurd!!

Respectfully,

Kevin L. Stoterau

This would be a repeat because after sending this email I sent a second with all the information that you requested.

Sorry my mistake, I should have read the entire email before responding. Thanks Todd Brandt Bowdle, SD

>

> Christmas. Think about all the college kids that come home for Christmas vacation. Sometimes that is the only time they are able to hunt. Also the competition is very high in the earlier part of the first deer season. Pheasant hunters hunt hard and have deer stirred

> up

> and pushed out of many of the CRP acres and tree groves. Many times we

> fill our tags during the second season as the pheasant hunters have slowed down some by then and the deer are more relaxed. Also that is when our girls come home from college and get to spend several days hunting instead of coming home late Friday night, hunting Saturday, for a short time on Sunday and then are headed back to school again. Thank You for listening to my opinion. Todd Brandt
